*In most cases, even found bicycles and suitcases cannot be assigned to the owner...*

powered by  road STAR

*One hundred thousand Lovers needed!*

*Campaign*

**KICKSTARTER**

*In the XXI century, in times of high technology and digitization, there are sufficient ways and means to help unscrupulous parts of our society to “rediscover” their conscience with knowledge and technology.*

*The **road STAR Security Program** serves to prevent thefts as well as to pursue and investigate them more efficiently. Together in tandem with finder SUPPORT, the program is set up to give the products the greatest possible security and to put the thieves to a halt as far as possible. All of this takes place on two levels with several coordinated services:*

- a) with technical means, from eye-catching measures such as the **road STAR license plate frame** to providing security by using nano-technology*

b) *and with legal means, whose smart tools with minimal effort for the customer as a part of the service, prosecute the perpetrators professionally and criminally for the damage caused and demand compensation far higher than "only" the financial equivalent of the stolen good because this compensation would include compensation for cases such as injury during mobility, attacks on property and security, as well as the purchase and adjustment of new vehicles. All this is always a much higher value than the stolen goods.*

*The clear goal and sign of the overall program is to curb stealing as much as possible and to make trading in stolen **road STAR products** unprofitable.*

*The activity in itself, which can easily expose even uninvolved and gullible dealers and buyers as such, would be classified as highly dangerous and with far wider consequences than before!*

*If you lose your **road STAR** items,  
honest finders can contact us via **finder** <sup>SUPPORT</sup>  
thanks to the finder number  
(which is also the product number)  
and we will assign the find to its current owner.*

## FLIX MOBILITY *Express Card*

Every road STAR technic & mobile product (Pledges 6-15) will receive the **FLIX MOBILITY Express Card**, which enables an own Digital Info Account and the use of the **finder** <sup>SUPPORT</sup>.

# *Flix Mobility Express*

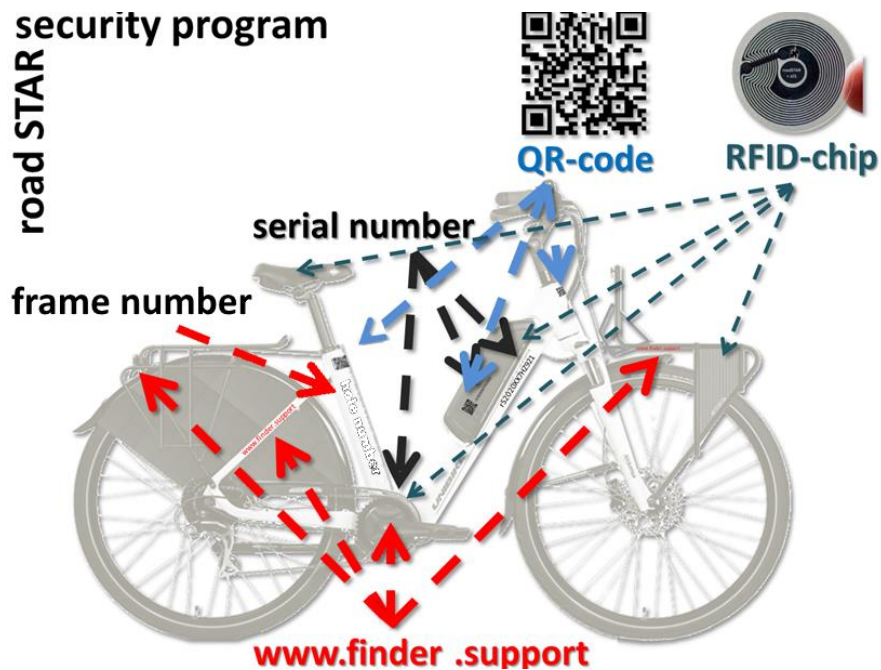

Each of this product has an **individual number** - either stamped or engraved - which leads to and is linked to our product DNA database<sup>1)</sup>, where all information can be found.

<sup>1)</sup> from product description, through material activation, visualisation of the producer, list of individual product components including catalogue number for spare parts orders, etc.

Your personal database is helpful for service, repairs or upgrades of the products for years (until you decide to delete them).

In your registration profile you are of course free to decide on the status of each product separately, to report the item as no longer existing, sold or missing, (of course without your contact details).

If a registered **road STAR product** is conventionally handed in at lost and found sites or to the police, they can - thanks to the **road STAR identification technology**

- a) protocol the suitcase or bike in great detail
- b) inform us about the find via **finder** <sup>SUPPORT</sup>
- c) and we will forward the information to you immediately.

### security & logistic

At the same time, this database makes a potential theft sale considerably more difficult. If a dishonest "finder" tries to sell your property, buyers can first check with **finder SUPPORT** whether the equipment has been reported missing or stolen, or, in case of a positive confirmation, register themselves as new owners.

A quick scan-glance and we see - have full information - what we want to know:

The database can also be used to easily create documentation for theft reports, e.g. for use in police reports, insurance and/or internally in companies.

In the future, **road STAR security technology** will also help with baggage handling in hotels and airports, as well as for storage and shipping - where you simply enter the destination online and the courier collects the suitcase from you or you drop it off at one of our shipping partners' collection points without any formalities.
